

Joydeep Samanta

+91 7001303096 | joydeepsamanta16@gmail.com | Durgapur, India | github.com/Joydeep10-py |

PROFESSIONAL SUMMARY

19-year-old Computer Science Engineering student focused on building predictive models and end-to-end pipelines, with practical expertise in algorithmic training and automated model optimization. Committed to converting complex datasets into accurate forecasts and actively applying neural networks or statistical frameworks to architect robust, scalable, and intelligent systems.

EDUCATION

Vellore Institute of Technology

B. Tech Computer Science and Engineering (Minor in AIML)

Bhopal, India

Sep 2025 – Aug 2029

Hem Sheela Model School

CBSE (Class XII) – Percentage: 85.4%

Durgapur, India

Apr 2010 – Apr 2024

EXPERIENCE

Co-Founder, Data Analyst

MBFT

Aug 2023 – Aug 2024

Kolkata, India (Remote)

- Maintained financial records of [MBFT.in](https://mbft.in)
- Managed annual financial records with over Rs 50,000 in transactions and performed exploratory data analysis to translate insights into actionable business decisions.
- Tools/Tech: Python, Jupyter Notebook, MS Excel, Power Bi, MySQL

PROJECTS

IPL 2026 Auction Analytics | Python, Jupyter Notebook, Power BI

- End-to-end data analytics project that scrapes IPL 2026 auction data using Python, cleans and structures visualizing key insights through an interactive Power BI dashboard. (Demo: <https://l1nk.dev/kfq6f>)
- GitHub: github.com/Joydeep10-py/IPL-2026-Auction-Analytics-Scraping-Cleaning-Visualization

Student Placement Predictor | Python, Jupyter Notebook

- Binary classification model built with Logistic Regression to predict student placement eligibility based on CGPA and IQ scores.
- GitHub: github.com/Joydeep10-py/student-placement-predictor

Car Showroom Management System | Python, Tkinter GUI

- This project leverages Python and MySQL to develop a system that enables users to buy and sell vehicles while maintaining an analytical record of transactions for administrative purposes. (Demo: shorturl.at/NiF1c)
- GitHub: github.com/Joydeep10-py/Car-Showroom-Management-System

TECHNICAL SKILLS

Languages: Python, Java, HTML/CSS, Javascript

Data Stack: MySQL, Power BI, MS Excel

Developer Tools: Jupyter Notebook, VS Code, IntelliJ, Antigravity

Computer Science Technicals: Data Structures and Algorithms, Object-Oriented Programming (OOP), Analytical Problem-Solving

CERTIFICATES

Introduction to Python

August 2025

- Skills Tested: Basics of Python, OOPs, Data Structures, Data Frames, Pandas, Matplotlib, Seaborn, Numpy, & multiple coding challenges
- URL: courses.analyticsvidhya.com/certificates/qvnaohhxe0
